

1UFTVR

For surface preparation of small areas or areas close to walls or between re-bars, the 1UF-TV R is second to none. Its also the ideal tool to compliment the U3-VR or the FB5-VR to scabber edges where larger Machines cant reach. It can remove up to 4 square metres per hour x 4mm deep, to a depth of 50mm. The vibration levels transmitted to the operator by the are typically less than 10% of the levels which are transmitted by the "Standard" 1UF pole scabber.
